

3 Piece Ball Valves Full Port: 1/4" - 4"

Series 5000
Series 6000

Flow-Tek's Series 5000/6000 ball valves offer the convenience of a three piece body design at an economical price. The 3 Piece design with a swing out center section allows for ease of in-line and out-of-line maintenance. Standard valve bodies are investment cast CF8M Stainless Steel or WCB Carbon Steel. All body castings are marked with a foundry heat number for full traceability.

These valves offer quarter turn operation and low operating torque. Series 5000/

6000 valves feature adjustable stem packing, stainless steel safety trigger locking handles and travel stops which limit handle movement to set 90° intervals. Flow-Tek's heavy duty, high quality stems are internal entry and blowout proof for maximum safety.

Each Series 5000/6000 valve features an integrally cast mounting pad complying with ISO 5211 that provides positive alignment when mounting actuators, gear operators or control accessories.

Pressure Rating:

Verify mounting dimensions before manufacturing mounting hardware.

Automated valves may require periodic gland nut adjustments.
