Global Leadership In Automatic Control Valve Design and Manufacturing

Company Overview

Cla-Val is a leading manufacturer of automatic control valves, serving waterworks, industrial, fire protection, aviation fueling and marine customers in more than 100 countries worldwide. Founded in 1936, our commitment to excellence and continuous improvement shows in each valve we produce and in the many new products we introduce to the marketplace each year.

Cla-Val is a global company with headquarters and a twenty-acre manufacturing/foundry complex in Costa Mesa, California, in addition to production facilities in Canada, Switzerland, France, the United Kingdom and New Zealand.

Cla-Val's long history of manufacturing and technical expertise also enables us to provide the industry's most comprehensive program of hands-on, personalized product training at our in-house training facilities in the US, Canada, Switzerland, the UK, France and New Zealand.

Cla-Val Automatic Control Valves are known for their exceptional quality and superior performance. The company is also recognized as a leader in the development of innovative technologies, specifically related to electronic products that help to conserve water and energy. Cla-Val's customer focus and commitment to excellent customer service is second to none.

Our company website at www.cla-val.com offers a comprehensive overview of our extensive product line and field service capabilities as well as access to hundreds of technical documents.

Commitment to Our Customers

- Cla-Val is committed to providing the highest quality automatic control valves at fair prices and deliveries in line with our customers' requirements.
- Cla-Val is committed to using ethical business practices with our customers, vendors, employees and other people with whom we come into contact.
- Cla-Val is committed to employing the best possible resources to provide our customers with ongoing improvements, advances and new concepts in our product offering.
- Cla-Val is committed to employing environmentally appropriate technology in all of our business activities. That commitment is illustrated by investments in our foundry and manufacturing facilities that enable us to comply with strict environmental requirements. Recent upgrades include thermal sand reclamation machinery, air filtration systems and high-efficiency furnaces.

Our Promise

As a global leader in the manufacture and design of automatic control valves, Cla-Val prides itself in being a socially responsible company in all areas of our business. We strive to make a positive impact in our communities and conduct business in accordance with the following policies:

- **Global Conflict Minerals Policy**

Cla-Val is committed to conducting business with a high degree of integrity and to conduct our business in a responsible manner. We support ending the violence and human rights violations in the mining of certain minerals in “Conflict Regions” and fully enforce Section 1502 of the US Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”).

- **Environmental Policy**

Cla-Val Company is committed to compliance with all applicable environmental and safety laws and to the protection of our employees. Beyond regulatory compliance, Cla-Val seeks to be a good steward of the Environment in which we conduct our business. Cla-Val also seeks to invest and protect its most valuable assets, each and every one of its employees.

- **Corporate Stewardship**

Cla-Val’s ownership, management, and employees believe very strongly in being responsible stewards of the company’s resources. Whether these resources be financial, environmental, or the personnel that comprise the company, Cla-Val seeks to do the very best with what we have. It is a privilege of the entire organization to give back to the communities in which we serve. By participating in local, national, and international causes, Cla-Val is able to reinvest its profits into causes supported by the organization.

- **Supplier Code of Conduct**

Cla-Val is committed to the highest ethical and legal standards in the conduct of its business. We are committed to comply with all applicable laws and regulations and to the upholding of human rights, as well as the protection of the environment. These commitments expand beyond our own operations, and extend into all aspects of our supply chain. As such, Cla-Val expects our suppliers and any sub-contracted suppliers to share these same commitments and values.

- **California Transparency in Supply Chains Act**

Cla-Val is committed to ensuring that our supply chain reflects our values and respect for human rights. As a part of our standard terms and conditions as well as the principles outlined in our Supplier Code of Conduct, we require our suppliers to comply with all applicable laws and to not engage in or support the use of child, forced, or involuntary labor.

Cla-Val Statement of Qualifications: A History of Excellence

Inventor and Producer of the Hytrol Control Valve

In the Beginning...

In the mid 1930s, the founder of Cla-Val, Donald G. Griswold designed the first hydraulic automatic control valve which was later dubbed the "Hytrol".

The 1940 patent for the Hytrol valve was the first of many new and innovative products Cla-Val would bring to the marketplace over the ensuing years.

The tradition of being Inventors, Innovators and Standard Bearers for Excellence lives on at Cla-Val as we celebrate our 81st year in business.

Aug. 31, 1943. D. G. GRISWOLD 2,328,009
Original Filed May 1, 1940

One of the world's first automatic control valve manufacturers

Innovation since 1936

Cla-Val Statement of Qualifications: Onsite Foundries

Onsite Foundries

Soundcast Company – Sand casting foundry

Griswold Castings – Investment foundry, lost wax process

By having two on-site foundries, Cla-Val is able to provide castings in over 55 different alloys, making our product offering one of the most extensive in the valve industry. It also allows us to respond more quickly to our customers' unique requirements. A small sample of the many materials our foundries produce include the following alloys:

- Ductile Iron
- Cast Steel
- Stainless Steel
- Monel
- Nickel Aluminum Bronze
- Naval Bronze
- Super Austenitic Stainless Steel
- Super Duplex Stainless Steel
- Titanium

Industrie Service

Soundcast delivers quality.

Cla-Val Statement of Qualifications: Manufacturing Overview

Global Manufacturing Facilities Overview

State-of-the art manufacturing equipment:

- Multiple Mazak Multi-Task Milling & Turning; CNC Lathe & Milling machines
- Many more manual machine cells including Vertical Turret Lathes

Large inventory of products on the shelf and ready to ship to meet customers' immediate needs

Computerized Multi-Task Machining

"E-Machine" - The latest in CNC Machining Equipment

Pilot Assembly - Adding the finishing touches

Final Assembly and Inspection

Maintaining a broad range of sizes and configurations
to meet our customers' immediate requirements

Committed to keeping an inventory of high demand
products for critical applications

Cla-Val Statement of Qualifications, Product Range

Product Range

Cla-Val offers an extensive range of products from basic hydraulic valves to SCADA compatible electronic control valves to perform the following functions in waterworks, water savings, industrial, fire protection, marine and aviation fueling applications.

Pressure Reducing
Pressure Relief
Pressure Management
Pressure Increasing
Cavitation Prevention
Surge Control
Electronic Flow Metering

Pump Control
Rate of Flow/Flow Limiting
Level Control
Tank Filling
Blending
Flushing
Reclaimed Water

Fire Suppression Deluge
Air Release
Vacuum Breaking
Flow Reversal Prevention
Fueling High-Level Shut-Off
Fueling Back Pressure Control
Contamination Monitoring

Built to last a lifetime

Size Range

from the smallest: 1/2-inch

To the largest: 48-inches

...and everything in between

Cla-Val Statement of Qualifications: Research & Development • Training • Online Resources

A Commitment to Research and Development: Cla-Val Product Innovations Set the Standard

Cla-Val automatic control valves reflect the lessons learned through more than seventy-five years of real-world experience in the industries we serve. This, coupled with our aggressive research and development programs, has resulted in the design and production of technologically advanced products that meet the challenges of increasingly complex and diverse applications. Our commitment to product innovation is embodied by our in-house R&D teams and state-of-the-art R&D labs in the US and Switzerland.

Cla-Val USA R & D Laboratory

Training Capabilities and Facilities

Cla-Val offers personalized technical assistance, maintenance support, and end-user training programs. Comprehensive engineering, service and application seminars are offered at each of our worldwide locations, including our new facility in New Zealand as well as at customer facilities. This, in turn, helps our customers to achieve optimal performance of Cla-Val products during start-up, after installation and through decades of reliable trouble-free service.

Cla-Val Europe R & D Laboratory

Cla-Val Statement of Qualifications: Approvals and Certifications

Approvals and Certifications

Cla-Val's waterworks and fire protection products meet all applicable standards and specifications prescribed by industry organizations such as AWWA, FDA, NSF, UL, and FM International. Along with ISO 9001 certifications for our production facilities in the US, Switzerland and the UK, and ISO 9002 for our manufacturing facility in Canada, Cla-Val also currently holds many other certifications, listings and approvals in North America and around the world.

NSF/ANSI STANDARD 61 Drinking Water System Components - Health Effects

Cla-Val Hytrol Valves in sizes from 1-1/4-inches through 36-inches meet the requirements set forth in NSF/ANSI Standard 61.

American Recovery and Reinvestment Act of 2009

Cla-Val Automatic Control Valves meet the "Buy American" Provisions of the ARRA.

Lead Limits for Products used in Waterworks Systems

Cla-Val Automatic Control Valves comply with the national lead free mandate "**Reduction of Lead in Drinking Water Act**" that dictates allowable lead levels in products used in water utility distribution piping systems.

Cla-Val Statement of Qualifications: Waterworks Industry

Cla-Val Waterworks Industry Experience and Capabilities

Cla-Val's automatic control valves are specifically designed to meet the requirements of water utility systems, greatly improving supply and distribution system efficiency. Our valves perform with precision and accuracy to provide exact control of pressure, flow, level, surge and pump control. Cla-Val electronic interface control valves combine the efficiency of hydraulic control with advanced technology electronics to provide the optimum SCADA remote control solution. Our commitment to developing solutions for our customers' operational challenges is demonstrated by the many product innovations we introduce to the waterworks market every year including the X144 Electronic Flow Meter; 33 Series Electronic Pilot Controls; X143 Series Power Generators; and the latest in our electronic products: the VC-22D Electronic Valve Controller.

Areas of expertise include a wide range of control valve applications for:

- Waterworks Distribution Systems
- SCADA Control
- Water Treatment Plants
- Reclaimed Water Systems

Modulating Level Control with Metering

30-Inch Pump Control Valves

Multiple Valves in Industrial Application

Cla-Val Statement of Qualifications: Mining and Industrial Facilities

Cla-Val Industrial Experience and Capabilities

Cla-Val has been in the control valve business for nearly 80 years. The Engineering expertise we have developed along the way has enabled us to design thousands of valve configurations for both standard and complex applications. Our fully staffed, in-house Engineering team, combined with extensive industry knowledge enables us to develop solutions for just about any industrial fluid control application you can think of. In fact, Cla-Val products are providing fluid control solutions at thousands industrial facilities and mines throughout the world.

Since the first Cla-Val Automatic Control Valve was produced in 1936, we have manufactured the best quality control valves available. We utilize the latest in manufacturing technology to ensure that each valve we produce is precisely machined to meet the exacting standards of the industrial marketplace.

One of Cla-Val's greatest strength is the ability to produce valves in **more than 50 different metals** poured in two on-site foundries located at our 20-acre facility in Southern California.

Each valve is tested and inspected before leaving the factory in accordance with the Cla-Val Quality Control Program and ISO 9001: 2008 requirements in order to meet the stringent performance and reliability criteria required by the following types of industrial operations:

- Mining
- Pulp and Paper
- Steel Mills
- Refineries
- Distilleries, Wineries and Breweries
- Power Generation
- Automotive Manufacturing
- Petrochemical

Cla-Val Strong

Cla-Val Statement of Qualifications: Onshore and Offshore Fire Protection

Cla-Val Fire Protection Industry Experience & Capabilities: Onshore and Offshore Applications

From fire suppression systems in high-rise buildings, mines and industrial facilities to the rigorous demands of fire protection systems aboard offshore oil platforms and FPSOs, Cla-Val products provide accurate and reliable performance in the most critical of services, both onshore and offshore. Applications include fire pump pressure relief; pump suction control, deluge, pressure regulation, air release and backflow prevention. Cla-Val Breach Valves protect life and property by preventing fire suppression water supplies from draining in the event of a catastrophic breach in the piping system.

Available in a wide range of special alloys, relevant Cla-Val products are approved and/or certified by MEA, UL, ULC, Factory Mutual and the American Bureau of Shipping.

Freedom Towers - New York City

Commercial High-Rise Fire Protection:

Breach Control, Pressure Reducing,
Pressure Increasing, Fire Pump Control,
Pump Check and Air Release

Mining & Onshore Industrial Fire Protection:

Breach Control, Pressure Reducing,
Pressure Increasing, Fire Pump Control,
Pump Check and Air Release

Seawater Service Fire Protection Products for Offshore Platforms and FPSOs :

Deluge, Pressure Reducing,
Pressure Increasing,
Fire Pump Control,
Pump Check and Air Release

Cla-Val Statement of Qualifications: Aviation Fueling

Cla-Val Aviation Fueling Industry Experience & Capabilities

Cla-Val control valves, refueling nozzles, couplers and other ground fueling equipment play a vital role in fuel handling systems for both civilian and military aviation. Our ground fueling products meet or exceed all relevant industry approvals such as API, EI Bulletin 1584 Third Edition, TÜV, STS-M, MIL-N-5877, MS24484 and all applicable ASTM and ANSI standards. Applications include control of fuel at receiving facilities, storage tanks, fuel/water separation stations, distribution/circulation systems and mobile refuelers and aircraft hot refueling.

From hydrant to aircraft, our proven design and quality workmanship makes Cla-Val one of the most trusted names in the commercial and military aviation industries.

Wide Range Pantograph

Commercial Aviation Fueling System - Fuel Storage Tanks

Worldwide Ground Fueling Support

Complete fueling products test facility at factory

Certifications & Approvals

- API Bulletin 1584, Third Edition - hydrant pit valves
- CE# 0036 for automatic control valves
- AF-System Safety Engineering Analysis – pantographs
- NSN – refueling nozzles
- ATEX – fueling nozzles and control valves

Cla-Val Statement of Qualifications: Marine Products

Cla-Val Marine Experience & Capabilities

Cla-Val marine products are designed to meet the exacting requirements of military and commercial shipboard applications. Our automatic control valves are utilized in nearly all of the US Navy's shipboard magazine sprinkler and AFFF fire fighting systems. The military has relied on Cla-Val products for more than 70 years to protect its personnel in the event of an on-board disaster.

On aircraft carriers, Cla-Val three-way fuel/defuel valves are provided for aircraft fueling and defueling, while other valves control fuel from storage tanks to the flight deck. Additional shipboard applications include cross connection control and lubricating oil pressure control. Specially designed Cla-Val pressure reducing and pressure relief valves are used in seawater systems. Further applications include flow control, solenoid control, and countermeasure wash down, ballasting/de-ballasting and void filling.

**Marine Magazine
Sprinkler Valve**

**Marine Fueling and
Defueling Valve**

**Top quality products for the entire fleet:
Aircraft Carriers, Frigates, Mine Sweepers,
Assault Ships, Landing Craft, Destroyers,
and Guided Missile Cruisers**

Cla-Val Statement of Qualifications: Quality Control • Environmental Health and Safety

Cla-Val Quality Control Program

All of Cla-Val's manufacturing processes and practices are verified by the procedures outlined in the Cla-Val Quality Control Manual, which dictates inspection points and controls on product as it moves through the manufacturing steps.

Enforced by the Quality Control Manual, the company provides and maintains an inspection system that will assure that all supplies and services submitted conform to contract requirements whether manufactured by Cla-Val; our foundries; processed by the contractor; or procured from subcontractors or vendors.

We also have in-house state-of-the-art testing facilities and equipment at both our foundry and manufacturing operations to further assurance optimum quality in every product we produce

Quality by Design

Cla-Val Environmental Health and Safety Program

The Environmental Health and Safety Department is responsible for implementing a program that ensures the health and safety of the company employees and helps minimize environmental impact related to our business operations. The objective the Environmental Health and Safety Program is to prevent personal injury through company-wide adherence to safety procedures and to follow environmental protection measures.

Cla-Val fulfills its mission to create and maintain a safe and environmentally sound workplace by adhering to procedures in the following major areas:

- Hazardous Waste & Materials Management
- Federal, State and Local Regulatory Compliance
- Health & Safety Inspection/Facility Audits
- Accident & Injury Prevention/Investigations
- Education, Training & Protective Equipment
- Safety Standard & Procedures
- Energy Efficient Facility and Systems

Cla-Val Statement of Qualifications: Technical Documentation

Supplemental Product and Company Information

Cla-Val has an extensive library of technical, marketing and company documentation to assist our customers in understanding the breadth of our product line and to make carefully considered choices when making product selections.

In addition to documents that are available on our website at www.cla-val.com, existing and potential customers may request hard or digital copies of a wide array of technical data sheets, application overview sheets, product animations, product presentations and brochures by contacting their regional sales office, the authorized sales agent for their area or by contacting any of our factories or global locations.
